Streamlined Compliance

The Supply Chain LMS, developed by Future Learning Systems, is a comprehensive platform designed to streamline training and compliance across your entire supply chain. It allows you to upload and manage e-learning courses, policies, and site induction programs, while enabling suppliers to self-register and oversee their teams' certifications. With 24/7 access to resources, real-time reporting, and a focus on improving safety, efficiency, and performance, the system ensures that all suppliers are properly trained and compliant with industry standards, minimising delays and boosting project quality.

Company Overview

↗ About Us

Future Learning Systems (FLS) are specialists in learning technologies and blended training solutions. We have been trading for almost 30 years and have extensive experience in the design, development and implementation of educational software and online delivery systems.

↗ Mission

Our mission is to empower businesses with innovative digital learning solutions that drive sustainable, personal growth.

↗ Vision

Our vision is to become a globally recognised leader in digital learning, renowned for our creativity, expertise, and unwavering commitment to our clients' success.

SCA Key Featues

The Complete Training Platform

↗ Comprehensive & Standardised

The Supply Chain Academy allows you to seamlessly upload all your existing elearning, policies, procedures, and site induction programs directly onto a single platform accessible to your entire supply chain. This includes not only the mandatory training required for compliance, but also additional courses from our library offered at no extra charge. With the self-registration feature, your suppliers can enroll their teams and manage their own training, drastically reducing the administrative burden on your company.

★★★★★

↗ Faster & smarter

Suppliers can appoint their own administrators to monitor training progress, ensuring that everyone on-site is certified and up-to-date with the latest industry standards. The system offers 24/7 access to all resources, allowing your suppliers to complete necessary training at their convenience, whether on-site or off. This comprehensive approach improves efficiency, reduces delays, and guarantees that all suppliers are qualified and ready to work, helping you deliver projects safely, on time, and within budget.

Load existing elearning, policies, procedures, and site induction programs.

Self-registration for suppliers – minimal administration for your company.

Supplier administrators manage their own teams and provide compliance reports.

Additional courses included from our library.

Completely customise your app to fit the branding and voice to your supply chain
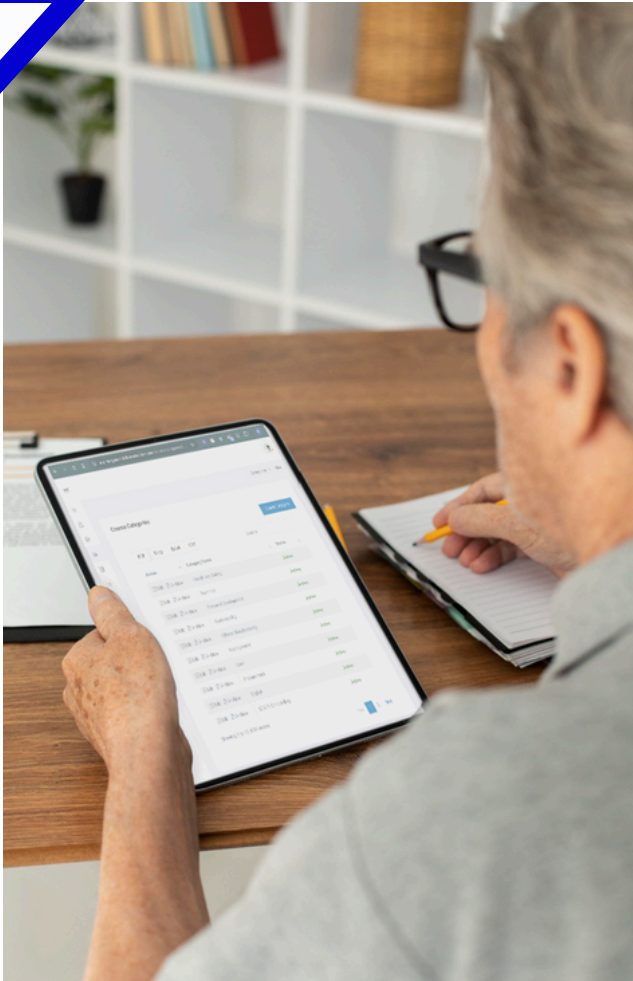

Benefits & ROI

Your Admin

Supplier Admin

Supplier Learner

Powerful Reports

Improved Safety & Compliance

Ensure all suppliers are fully trained and licensed, meeting safety and legal requirements.

Time & Cost Efficiency

Reduce project delays by standardising training and procedures.

Quality & Performance

Consistent delivery of best practices across all suppliers improves project outcomes.

How it Works

↗ Supported By FLS

After a consultation, we will implement any branding requirements and specific process tailoring. This won't take long, and following this the flow comes in 4 simple steps...

Upload existing content

1 Upload existing courses/resources FLS will configure the Academy to include all courses, videos and documents etc. along with your initial supplier listing.

Enrol supplier administrators

2 Each supplier will have one or more nominated administrator(s) set up.

Suppliers enroll their staff

3 Supplier administrators can upload any/all of their staff and self-registration is also available to the suppliers, if preferred.

Access real-time reporting

4 Supplier administrators can generate reports for their own organisation and any super administrators set up within your company can access and report on everyone within the system.

↗ Supplier Support

We also support suppliers in managing their own teams' certifications and compliance. With our platform, you'll have access to real-time reporting, giving you the confidence that your entire supply chain is fully trained and compliant, no matter where or when.

Client Testimonials

↗ Highways England

SMP Alliance - Partner LMS

I have worked with FLS for over a decade now and over this time I have built up a great working relationship with the company directors and their wider team, they understand the way we work and will always go above and beyond. FLS have implemented our Learning Management System for Smart Motorway Programme Alliance, the LMS has been developed and is easy to use and accessible 24/7 and has been received well by our colleagues within the SMP Alliance and our parent organisations and supply partners.

FLS always provide encouragement and support with our business ideas for blended learning module development and making them come to life! The team are always happy to advise, support and make changes and updates as requested by either myself or my team, I can' thank them enough for their support and supporting the SMP Alliance learners, whom have a fantastic learning experience! – **Thank You!**

Gavin Knight
Head of People Development

↗ Morgan Sindall Construction

Supply Chain Academy

The team within Future learning Systems continue to provide an exceptional service to Morgan Sindall. They have been instrumental in helping us to deliver our vision of creating an Academy of knowledge and skills for the benefit of our Supply Chain. Without shadow of a doubt their customer service is second to none as they not only respond to our needs but also help us to think of ways to continually improve the platform.
